Today, 1 in 7 women will develop breast cancer in her lifetime in the Northwest. Genetics accounts for 10-15% of all diagnoses. Recurrence is 20-30%. Breast cancer is a leading cause of long-term illness and death among women. Research shows that with prevention and new modalities for treatment, survival rates increase, recurrences are lower, and lives are saved.

Pink Lemonade Project was formed in 2010 by Drs. Allen and Cassie Gabriel to educate, empower and support people impacted by breast cancer in SW Washington. The programs were designed with healthcare partners and patients alike to better support people before a diagnosis, during treatment and survivorship.

We offer the most diverse, unique programs available to breast cancer patients across 42 counties in SW Washington and Oregon:

1. Revive Retreats
2. Financial Assistance Programs: Pink Practicalities/Holiday Glow/Treatment Access Program
3. Pink Link Education Events + Fitness Meetups
4. Support Groups
5. Pink Peers Mentorship Program
6. Metastatic Breast Cancer Dinner Series
7. Jill's Book Bank

In 2023, Pink Lemonade served 3,175 people across the region, 24% increase over 2022.
